

Beneficial Earth Energy Checklist

Bob Dahse

GeoPathfinder.net

revised 07/04/2016

<u>Energy</u>	<u>My Working Term</u>	<u>More Descriptive term</u>	<u>Precise description</u>
Neutral Effect	Track Line (TL)	Twin Triple Pathway	Two sets of three parallel, vertical planes
	Wide Mixed Solar Line (WMS)	Mixed Energy Reversing Pathway	30 straight, parallel, equidistant, vert. planes at 9" intervals; Day: energy moves downward; rev. at night
	Aquastraight Line (AST) in daytime	Wide 23-Plane Spring Locator	23 straight, parallel, vert., equidistant planes; 20 feet wide; like the night AST but all planes are beneficial
	Aquastat (AS)	Irregular 12-Plane Spring Locator	4 sets of 3 parallel, vertical planes, roughly 6 feet wide, occurring in groups of three
	Spring Spiral (SS)	5-Plane Spring Spiral	Five parallel, equidistant, vertical planes in a tight CCW spiral, formed above a rising water column
	Magnetic Vortex (MV)	Downward 11-cylinder Vortex	"Tornado" shape of 11 concentric, vertical cylinders; CW spin; very complex formation but very common
	Electric Vortex (EV)	Upward 11-Cylinder Vortex	Upside-down version of the above with upward-moving energy; CCW spin; also very complex and common
	Three-Ring Circle (3RC)	Enormous 3-Plane Cylinder	Three concentric, vertical cylinders, about 9 inches apart but with a diameter of roughly 350 feet; frequent
	Subtle Line (SL)	Straight Beneficial 7-Plane Pathway	Seven parallel, equidistant, vertical planes; 3 feet wide and straight
	Cosmic Circle (CC)	Huge 11-Plane Concentric Cylinders	11-plane, vertical, concentric cylinders, 352-358 feet in diameter; about 7.5 inches between planes
	Rotating Bull's-Eye Pattern (RBP)	Rotating 6-Plane Concentric Cyls.	6 evenly-spaced, vertical, concentric cylinders; about 10 foot diameter; CW rotation; strongest at center 3
	Celtic Cross Spiral Line (CCS)	Wide 5-Plane Spiral	foot wide, vertical, 5-plane spiral; spinning outward CW or CCW; ending within 1/4 mile in a tight spiral
	Geodetic Line (GL)*	Wide 11-Plane Alternating Pathway	Straight, vertical, single plane in a several-hundred-foot wide group of 11 yin/yang pathways
More Beneficial	Subtle Irregular Line (SIL)	Irregular 4-Plane Pathway	4 straight, vertical, non-directional planes; 21 inches wide with 5" between inner planes, 8" between outer
	Serpent Line/ Dragon Line (DL)	Enormous 21-Plane Spiral Pathway	Twenty-one vertical, single-plane, CW or CCW spirals; 100+ feet between planes; infrequent
	Positive 4-Spiral Bull's-Eye (P4B)	Spiral Concentric Cylinder Complex	Five concentric, vertical cylinders with four CW and CCW, spiraling, single planes moving toward it
	Potential Cavity Vortex (PCV)	Single Vertical Line	Single, vertical, or slightly leaning line; no thickness; forms at the center point of a future sinkhole
	Three-Spiral Cylinder (3SC)	Spiral Cylinder Complex	4-foot vertical cylinder flowing into three short, CCW, 3-plane, vertical spirals, each 6 inches wide in total
	Positive Mental Line (PML)	Benef. 5-Plane Meandering Pathway	Five parallel, vertical, equidistant planes; about 1 foot wide and undulating
	Aerial Grid Line (AGL)*	Paired 12-Plane Grid Pathway	3 sets of 4 vertical up & downward-flowing planes; 4 feet between sets, 9 feet wide in total; occur in pairs
	Inflow Zone (IZ)	12-Plane Concentric Cylinders	12 equidistant, vertical, concentric cylinders; 22 inches apart, 25 foot diameter; energy moves downward
	Electromagnetic Vortex (EMV)	Paired Mixed 11-Cylinder Vortex	Combines all of the features of Electric and Magnetic Vortices ("MV" & "EV" above); occur in nearby pairs
	River Lines (RL)	5-Plane River Bed Indicator	Five straight, vertical, parallel, equidistant planes at an 11-inch spacing, usually following a river's course
	Positive Bull's-Eye Pattern (PBP)	4-Plane Concentric Cylinders	Four concentric, vertical cylinders forming a 6 to 14 foot diameter "target" pattern
	Reversing Monadic Spiral (RMS)	Day-Night Reversing 6-Plane Spiral	Day: 6 vert., parallel, equidistant planes in a 10" wide spiral; energy moves outward & CCW, rev. at night
	Wide Conc. Cylinder Cluster (WCCC)	Huge 87-Plane Concentric Cylinders	87 vertical, equidistant, concentric cylinders; 167 foot diameter; intensity highest at center
	Pos. Straight Monadic Path (PSMP)	Wide Double 4-Plane Pathway	2 parallel sets of 4 vertical, parallel, equidistant planes at 7 inch plane spacing; 19 feet between sets
	Celtic Cross Straight Line (CCS)	3/5/7-Plane Straight Pathway	Many vertical, parallel, equidistant, straight, 3 foot wide pathways, each with 3, 5, or 7 planes
	Continental Spiral (CS)	Enormous 21-Plane Spiral	21 vertical, parallel, equidistant planes at 180 foot spacing; paired CW and CCW, outward-flowing spirals
	Telluric Channel (TC)	Single-Plane Vortex Connector	Single, straight, vertical plane follows a low-frequency AC or DC power flow connecting "EV" & "MV", above
	Chi Lines (CL)	Single-Plane Meandering Pathway	Single, 3" wide, vert., undulating, unidirectional plane; often enters east window/door and exits in the west
	Single Subtle Spiral (SSS)	Single Tight CCW Spiral	Single, vertical, outward & CCW-moving spiral plane at 14 inch spacing; energy decreases from the center
	Spiral-Fed Grid (SFG)	Spiral Grid Complex	Four 3-plane, vert. spirals flow outward & CCW 16 feet into a single-plane grid crossing, 20 miles apart
	Sleep Lines (SLP)	Night-time 11-Plane Pathway	11 straight, vertical, parallel, equidistant planes flowing north-south at 6 inch spacing; only occurs at night
	Triple Spiral (TS)	6-Plane Spiral Triangle	Three large, connected, vertical, 6-plane spirals, rotating inward & CCW, in a 100 foot triangular pattern
	Single Oval Cylinder (SOC)	Single-Plane Oval Cylinder	Single-plane, vertical, oval cylinder; less than 9 feet across but sizes vary
	Single Circle (SC)	Downward Single-Plane Cylinder	Single, vertical cylinder; roughly 30 foot diameter; energy moves downward
	Wide Planetary Grid Line (WPG)*	8/11-Plane Variable Grid	8 or 11 vertical, parallel, nearly straight, variable-width, infrequent, unidirectional, grid-forming planes
Most Beneficial	Blind Spring or Water Dome (BS)	Single-Plane Spring Cylinder	Underground pool formed from rising water forms vert. energy cylinder; origin point of "WE", "AST" & "AS"
	Celtic Cross Circle (CCC)	Hundred-Plane Concentric Cylinder	Hundreds of vertical, equidistant, concentric cylinders formed at center crossing of "CCS" planes (above)

* The term, "ley line" can mean almost anything, but the "GL", "AGL", and "WPG" are the three most often referred to by that title. They differ in pattern, width, and intensity. "GL" lines are hundreds of feet wide and rare, "AGL" lines are about 9 feet wide and infrequent, and "WPG" lines are 29 to 42 feet wide, occurring every 123 miles (E-W lines only).
